Login to your MQL5 account on your MT4 Platform

(PC)

In the Terminal section below,
go to **Market > Purchased**

Category

Product is purchased, but not downloaded yet | **Install** | Utilities
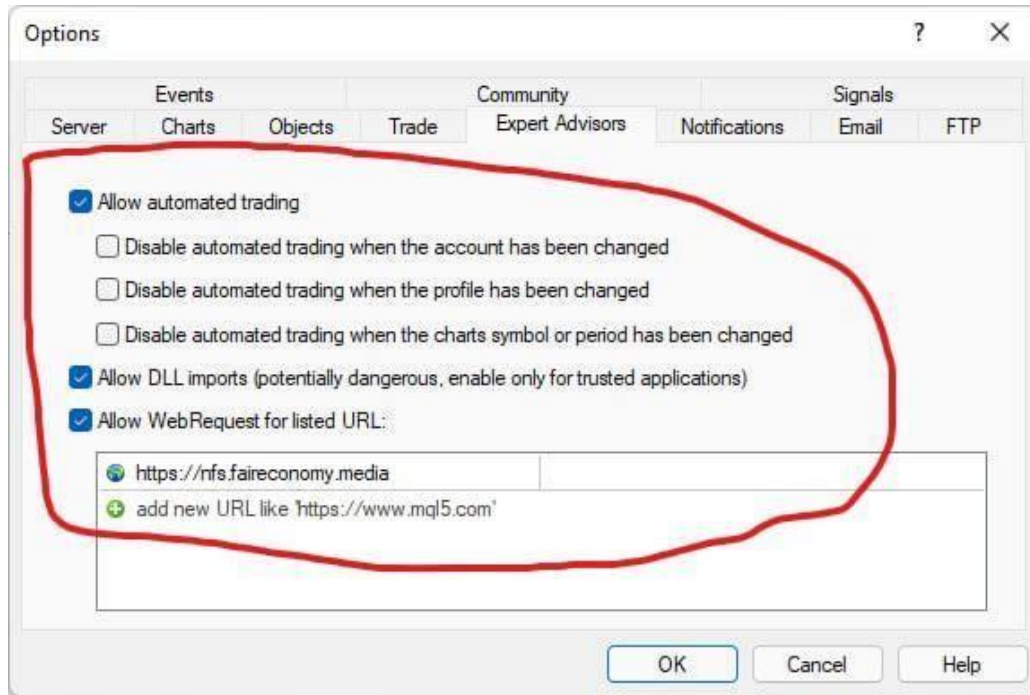

Press **Install** Button

On the Navigator (**CTRL+N**), Drag and Drop the Tool from **Expert Advisor > Market** to the chart.
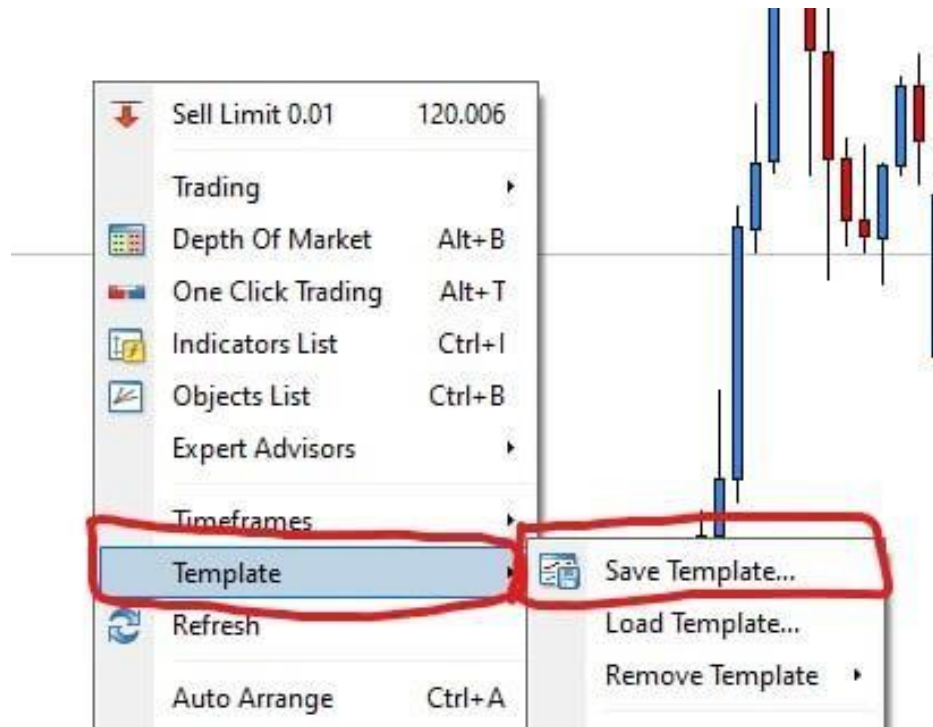

Go to **Common** tab and check this

Then go to menu on on the top left above: **Tools > Options > Expert Advisors** tab, follow the settings like this
On the chart, **Right Click > Template > Save Template....**

Then save the template name: **Default.tpl**
So every time you open the chart it will auto load the current settings.

← And also click this

Congratulations!

Now you already configure the StarseedFX Smart Trading Tool correctly.
